

# CYBERSECURITY STRATEGY & EXECUTION

With the velocity of attacks increasing day by day, a trusted cybersecurity strategy is one of the most important areas the executive team must address. StrataFusion's success is built on technology know-how that moves business forward and gets results. From fractional services, cloud infrastructure, cybersecurity and digital transformation, our core competencies help clients navigate obstacles and move confidently through challenges and change, regardless of industry. Our partners put into action expertise and tested strategies to achieve the business outcomes that accelerate success.

## HOW WE CAN HELP

Align Cyber  
Risk Profile to  
Business  
Strategy

NextGen Security  
Landscape &  
Roadmap  
Development

Protect Critical  
Assets,  
Intellectual  
Property, Privacy;  
GDPR /  
Regulatory  
Compliance

Actionable

Strategy

## STRATAFUSION DELIVERS EXPERTISE THAT MATTERS

Built on decades of executive-level work at some of the world's biggest brands, StrataFusion is comprised of technology advisors who are focused on delivering results for tomorrow's digital business. Our partners are former CIOs, CISOs, CTOs and other c-suite executives who have proven experience in disruptive organizations, from large, storied companies to scrappy start-ups. These real-world operators drive practical, results-oriented actions. That expertise brings a customized approach and strong leadership point of view to drive alignment between business and technology.
